About SIF

By ICICI PRUDENTIAL MUTUAL FUND

What are Specialized Investment Funds (SIFs)

To address the structural gap between Mutual Funds and PMS, the Securities and Exchange Board of India (SEBI) has introduced a new regulatory framework titled Specialized Investment Funds (SIFs) as a part of MF Regulations, positioned as an intermediate investment vehicle that combines the regulatory transparency of mutual funds with portfolio flexibility.

MUTUAL FUNDS

Offers wide range of products, but restricted in portfolio flexibility including advanced derivative strategies

THE GAP

SIFs

A middle ground >
Offers portfolio flexibility including advanced derivative strategies at INR 10 lakh and above entry point

PMS/AIF

Offers portfolio flexibility. but requires a minimum ticket size of INR 50 lakh and above for PMS & INR 1cr and above for AIF

Comparative Positioning

Feature	Mutual Funds	SIFs	PMS/AIFs
Regulation	SEBI (Mutual Funds) Regulations, 2026	Chapter IX of SEBI (Mutual Funds) Regulations, 2026	SEBI (Portfolio Managers) Regulations, 2020 SEBI (Alternative Investment Funds) Regulations, 2012
Investor Base	Retail and HNI	HNI	HNI and Ultra HNI
Minimum Investment	₹100+	₹10 lakh	₹50 lakh & above
Base Expense	Max at 2.10% and 1.85%	Max at 2.10% and 1.85%	Management Fee + Performance Fee
Derivatives	For Hedging & Portfolio Re-balancing	Unhedged Derivatives + Hedging + Portfolio Re-balancing	PMS: For Hedging & Portfolio Re-balancing AIF: Allowed
Single Issuer Limit for Debt Instruments (% of AUM)	Upto 10%	Upto 20%	AIF Cat III: Upto 10%; PMS: No Limit

Market Outlook

iSIF By ICICI PRUDENTIAL MUTUAL FUND

Equity Outlook & Triggers

Global Update: In July 2026, the S&P 500 and Nasdaq 100 experienced severe volatility, marked by semiconductor sell-offs, status quo on Federal Reserve rate decision amid rising Treasury yields, and choppy tech earnings. The S&P 500 index fell 0.1% and Nasdaq 100 fell 6.6% in July 2026.

In the UK, the FTSE 100 showed a resilient upward trajectory because of strength in its energy, mining and banking constituents, which benefited from higher oil prices and a run of stronger than expected earnings. The index rose 3.5% in July 2026.

The STOXX 600 achieved its fourth consecutive monthly gain, driven by artificial intelligence optimism, resilient corporate earnings, and global technology rallies. The pan-European benchmark Stoxx600 index closed 1.2% higher in July 2026.

China's equity market barometer index, Shanghai Composite, declined by roughly 6.4% in July 2026. This downward movement was driven by weak domestic manufacturing data, contracting factory activity, and global technology sector volatility.

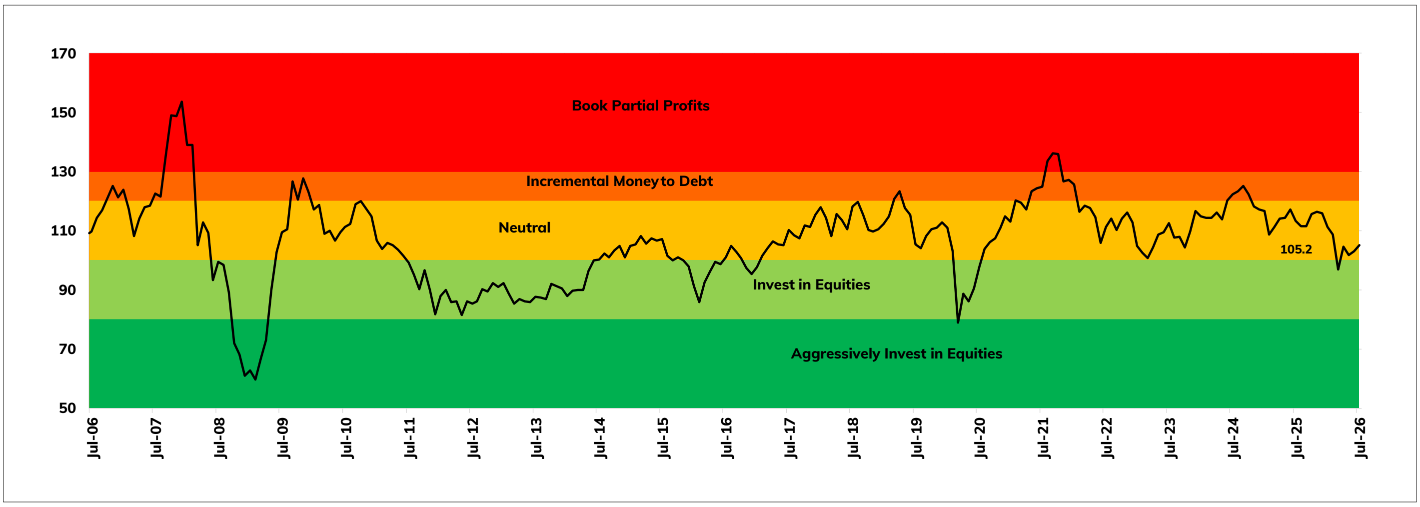
Japan's Nikkei 225 declined 8.1% in July 2026 primarily due to a global selloff in artificial intelligence and semiconductor stocks, a stronger yen, and rising geopolitical tensions.

India Update: Indian equities rallied during the month due to surge in technology sector, renewed foreign institutional buying, and solid corporate earnings. The Sensex rose 2.1% whereas the Nifty50 rose 2.2% in July 2026. FPIs bought Rs.20,220 crore in July 2026 compared to outflow of Rs.49,340 crore in June 2026. (Source: NSDL)

Sector-wise, BSE Capital Goods (-5.4%), BSE Power (-5.3%) and BSE Bankex (-0.2%) were laggards, whereas, BSE Infotech (+14.7%), BSE Consumer Durables (+9.3%) and BSE Realty (+8.6%) gained the most. (Source: BSE)

Our view going forward:

- Although Indian markets rallied in July 2026, they continue to remain volatile given – a) sharp swings in crude oil prices due to renewed tensions between US & Iran b) uncertainty around US Fed communication c) Rupee staying at the weaker end.
- Performance during the month, was largely driven by rotation into India due to the Global AI de-risking phase.
- On the macro front, the Rupee has depreciated ~10% in last one year, making it an undervalued currency. Concerns around Current Account Balance eased a bit as Mar-2026 quarter saw a surplus at 0.7% of GDP.
- India's GDP numbers were resilient for FY25-26 as it accelerated to 7.7% in FY26 (vs 7.1% in FY25) reflecting stronger economic activity.
- Other macro indicators too remain robust – Fiscal Deficit is under control, demand environment is good, in the current fiscal, Govt. has kick started capex on a high note and earnings are resilient in the wake of geo-political tensions
- These factors bode well for long term prospects of the economy and markets
- However, in the near term we believe markets will be volatile as the uncertainty around the conclusion of US-Iran war remains high. Also, other triggers which may impact markets in near term include a heavy domestic IPO market and elevated global valuations driven by AI rally
- Equity valuations continue to remain in neutral zone currently. We continue recommending investing in equities in a staggered manner through SIP in investment Strategy that have the flexibility to maneuver across sectors / market cap.
- Since market volatility may persist in the near term, we also continue to recommend investing in Hybrid / Asset Allocation investment Strategy.



Data as on July 31, 2026 has been considered. Equity Valuation Index (EVI) is a proprietary model of ICICI Prudential AMC Ltd. (the AMC) used for assessing overall equity market valuations. The AMC may also use this model for other facilities/features offered by the AMC. Equity Valuation index is calculated by assigning equal weights to Price-to-Earnings (PE), Price-to-Book (PB), G-Sec*PE and Market Cap to GDP ratio and any other factor which the AMC may add / delete from time to time. G-Sec – Government Securities. GDP – Gross Domestic Product.

Market Outlook

Debt Outlook & Triggers

In July 2026, fixed income yields experienced a sharp increase, driven by rising global bond rates, concerns over domestic inflation stemming from higher crude oil prices, and shifting foreign investor flows. Despite this, credit growth has remained robust, and if economic growth continues on its upward trajectory, we expect the output gap to narrow.

The recent postponement of G-sec bond inclusion in global indexes has reduced the likelihood of a G-sec rally in the near term. On the positive side, however, the Reserve Bank of India's measures aimed at attracting NRI deposits and covering hedging costs for banks are anticipated to generate significant deposits for banks and improve liquidity conditions. The measures may cap risk premiums on yields in the short term, resulting in a generally positive outlook for debt markets.

That said, we believe that much of the easing in yields may already be behind us. Therefore, we advise investors to avoid making aggressive long-term duration bets. Instead, the focus should be on steady carry, capital preservation, and risk-adjusted returns.

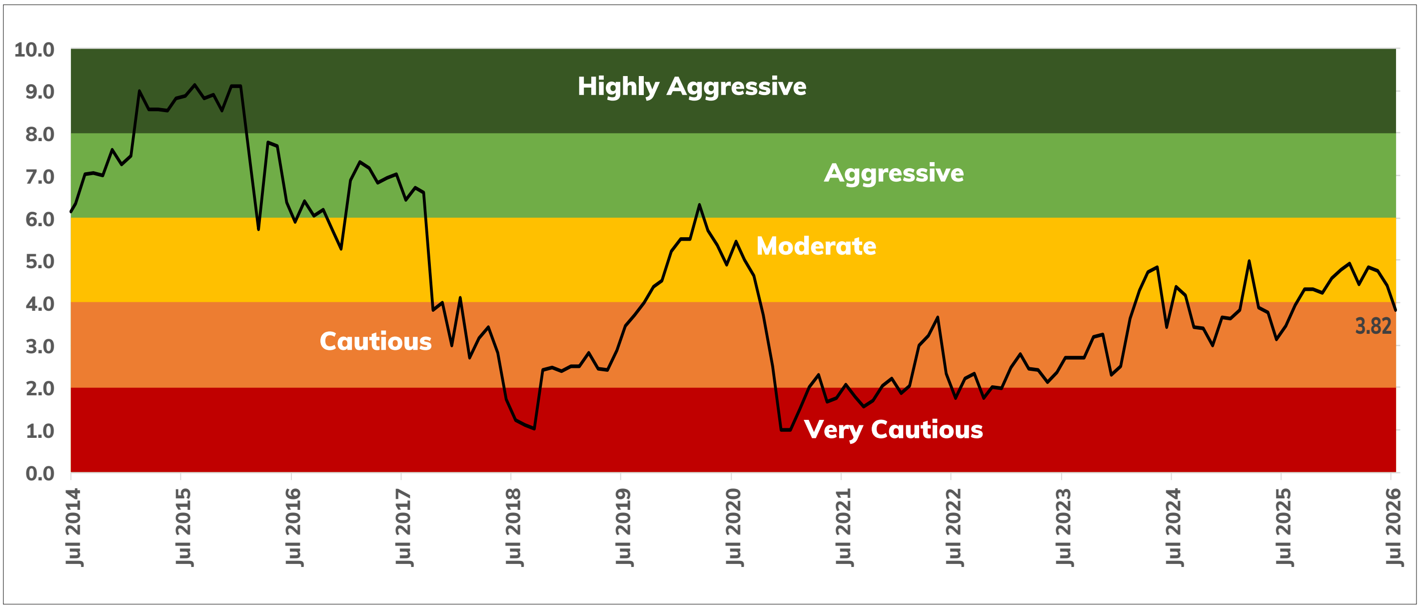
Within the fixed income market, we favor corporate bonds in the 1- to 3-year duration range. On the sovereign side, we maintain a positive outlook on long-dated State Government Securities. Consequently, we recommend investment in short-term products, corporate bonds, floating interest instruments, and banking and PSU debt in the current environment.

Market Activity

The 10-year Indian benchmark bond yield rose to 6.83% on July 31, 2026, up 7 bps compared to 6.76% as on June 30, 2026.

Liquidity conditions were generally in surplus during the month. The 91-day T-bill yield rose 10 bps on-month to 5.34% whereas the 182-day T-bill rose 17 bps to 5.59%. (Source: CCIL)

bps – basis points; T-bill – Treasury Bill; RBI – The Reserve Bank of India; MPC – Monetary policy committee; SDL – State Development Loans. GST – Goods and services tax.



Data as on July 31, 2026. Debt Valuation Index considers WPI, CPI, Sensex returns, Gold returns and Real estate returns over G-Sec yield, Current Account Balance, Fiscal Balance, Credit Growth and Crude Oil Movement and any other factor which the AMC may add / delete from time to time for calculation. Debt Valuations Index is a proprietary model of ICICI Prudential AMC Ltd (the AMC) used for assessing overall debt valuations. The AMC may also use this model for other facilities / features offered by the AMC.

iSIF Equity Long-Short Fund

An open ended equity investment strategy investing in listed equity and equity related instruments including limited short exposure in equity through derivative instruments.

iSIF By ICICI PRUDENTIAL MUTUAL FUND

The Investment Strategy can also adopt equity and debt derivative strategies. The Investment Strategy can also invest in units of InvITs.
There is no assurance that the investment objective of the Investment strategy will be achieved.

Investment Approach

Equity & Equity Related Securities (65%-75%) #25% in Unhedged short exposure through derivative instruments*	Debt (25%-35%) #25% in Unhedged short exposure through derivative instruments*	Others (0%-10%)
Follows a bottom up approach for stock selection	Debt & Money Market Instruments and Units of Debt Oriented Mutual Funds	Units issued by Infrastructure Investment Trust (InvITs)

*Please note that the investment approach will be as per ISID.
#Derivatives exposure will be upto 100% & Unhedged short position will be upto 25% of net assets.

Investment Parameters

Below mentioned are some key parameters that may be used for taking allocation calls:

Market Triggers		Market Dynamics	
Model Inputs	**Market Positioning**	**Derivatives**	**Active Calls**
• Price to Book • Currency/REER • Earnings yield vs Bond yield • RSI	• Market Trend • FII Positioning • Flows	• Hedging • Directional	• Stock and Sector • IPO/QIP/Buybacks • Duration and Credit (Debt)

This is only for illustrative purpose. The Investment Approach will be as per ISID. FII: Foreign Institutional Investors; RSI: Relative Strength Index

Why invest in iSIF Hybrid Long-Short Fund?

PHILOSOPHY
Aims to generate risk adjusted returns with lower volatility

UNIVERSE
Aims to generate returns by combining long-short equity positions, derivatives and fixed income investments

VALUATIONS
Allocates higher in equities when the equity market valuation is low and lower when the equity market valuation is high.

TAXATION
Enjoys LTCG rate of 12.5% with holding period more than 12 months
LTCG – Long Term Capital Gain

The tax implications arising from the changes in the attributes of the investment strategy will be determined based on the prevailing tax laws and regulations. However, it is clarified that the tax rates applicable to the unitholders would be subject to the actual positioning of the portfolio. Investors are advised to seek professional advise from financial, tax and legal advisor before investing.

iSIF Active Asset Allocator Long-Short Fund

An interval investment strategy dynamically investing across equity, debt, equity and debt derivatives, InVITs and commodity derivatives, including limited short exposure on permitted instruments through derivatives.

iSIF By ICICI PRUDENTIAL MUTUAL FUND

Investment Objective

The Investment Strategy intends to dynamically invest in equity and equity related securities with an aim to achieve long term capital appreciation and also invest in Debt instruments to generate regular income. The Investment Strategy can also invest in units of InVITs. The Investment Strategy can also adopt equity, debt and commodity derivative strategies.
There is no assurance that the investment objective of the Investment strategy will be achieved.

Investment Approach

Equity & Equity Related Securities (35%-80%) #25% in Unhedged short exposure through derivative instruments*	Debt #25% in Unhedged short exposure through derivative instruments*	Commodities**	Others (0%-20%)
Follows a bottom up approach for stock selection	Debt & Money Market instruments and Units of Debt Oriented Mutual Funds	Exchange traded Commodity derivatives	Units issued by Infrastructure Investment Trust (InvITs)
	10%-55%		

The allocation towards debt and commodities shall be dynamically managed, at times the exposure to commodities can be zero or less than 10% of NAV and maximum exposure to commodities shall be upto 30% of NAV. Exposure to exchange traded commodities of a particular good shall not exceed 10% of NAV.

#Derivatives exposure will be upto 100% & Unhedged short position will be upto 25% of net assets.

**Participation of Mutual Funds in ETCDs, Multi Assets allocation schemes/Investment Strategies shall not exceed 30% of the NAV of the scheme/investment strategy and other Hybrid Schemes excluding Multi Assets allocation schemes/Investment Strategies shall not exceeding 10% of NAV of the scheme/investment strategy.

*Please note that the investment approach will be as per ISID.

Investment Parameters

Below mentioned are some key parameters that may be used for taking allocation calls:

Equity Model Approach & Framework
Equity Model considers various parameters including. Rolling forward PB and Corporate Profits as % to GDP

Debt Model Approach
Debt model considers internal macro frameworks. on duration, researched investments in credit

Commodity Sub-Allocation
Allocates within the commodity bucket across gold, silver, crude, copper, aluminum using commodity specific drivers layered on the macro regime.

Macro Regime Overlay
Identifies the Growth x Inflation quadrant to confirm risk environment and duration stance.

This is only for illustrative purpose. The Investment Approach will be as per ISID. FII: Foreign Institutional Investors; RSI: Relative Strength Index

Why invest in iSIF Active Asset Allocator Long-Short Fund?

PHILOSOPHY
Aims for risk adjusted returns through asset allocation and portfolio optimization

FLEXIBILITY
The investment strategy has the flexibility to shift actively between equity, debt, exchange traded commodity derivatives and InvITs based on market conditions

VALUATIONS
The interval investment strategy dynamically allocates between equity, debt and commodities with philosophy of "Buy Low, Sell High"

TAXATION
Tax efficient for investors
STCG: Slab Rate on investments held for up to 12 months;
LTCG: 12.5% tax on investments held for more than 12 months

The investments of the Investment Strategy would be as per the asset allocation and investment approach of the Investment Strategy Information Document. The holding period for long term capital gains (LTCG) shall be more than 12 months as the units of the investment strategy shall be listed on the recognised stock exchanges. Please refer to Investment Strategy Information Document for more details and consult your tax advisor for further details on taxation.

SIP can be registered by the existing investor who has Minimum Application Amount of Rs. 10 Lakhs

CUSTOMER ONBOARDING PROCESS – ONLINE

Registration/Login –
A new investor can create their account on the SIF website by validating their Email ID and Mobile Number via separate OTPs. In case the user is an existing MF investor, they can reuse the same login credentials as on the MF website/i-Invest app to login to the SIF website.

Dashboard-
After logging into the SIF website, the investor can start their folio creation from the dashboard. After their investments are processed, the investor will be able to see investment details like current value, invested value, returns and the investment breakdown across strategies on the dashboard.

Folio Creation -
Investors are required to create a new folio for SIF investments which they can easily do from the website. New to iPru investors have to enter personal, bank, nominee details and submit FATCA declaration to create a folio. An existing to iPru investor will be nudged with his existing MF folio details which they can use to pre-fill their details in the SIF folio creation journey, thereby adding convenience to the process.

Transaction-
From the website, an investor can carry out lumpsum and SIP transactions digitally in the various SIF strategies on offer.
They can also redeem basis amount/units from the website.

By ICICI PRUDENTIAL MUTUAL FUND

CUSTOMER ONBOARDING PROCESS – OFFLINE

Investment Modes:
An investor can choose between investing in physical mode or online mode.

→ **Complete KYC:**
The investor must first complete the Know Your Customer (KYC) process (incase investor is not KYC compliant) before making an investment.

→ **Submit Application and Payment (Physical):**
After KYC compliance, the investor in physical mode needs to submit an investment application form and a cheque from their registered bank account to the nearest Asset Management Company (AMC) branch.

→ **Branch Review and Acknowledge:**
The AMC branch reviews the application, timestamps it, and provides an acknowledgment to the investor.

Forward to RTA:
The branch then forwards the application to the Registrar and Transfer Agent (RTA) for further validation.

→ **RTA Validation and Processing:**
The investor must first complete the Know Your Customer (KYC) process before making an investment.

→ **Receive Statement of Account:**
A Statement of Account is sent to the investor's registered email address after processing.

Schedule 1:
One Liner Definitions

By ICICI PRUDENTIAL MUTUAL FUND

Macaulay Duration :
The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

Modified Duration :
Modified Duration is the price sensitivity and the percentage change in price for a unit change in yield.

Total Expense Ratio :
Total expense ratio is the percentage of net expenses that are charged by the fund. The net asset value of the fund is calculated after deducting total expense ratio.

Average Maturity :
Weighted Average Maturity of the assets.

Portfolio Yield (Yield To Maturity) :
Weighted Average valuation yield of the assets.

Growth and Cumulative option :
Growth and Cumulative words are used alternatively.

Schedule 2:
How To Read Factsheet

iSIF
By ICICI PRUDENTIAL MUTUAL FUND

Fund Manager :
An employee of the asset management company such as a Investment Strategy or life insurer, who manages investments of the Investment Strategy. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription :
This is the minimum investment amount for a new investor in a Investment Strategy.

Minimum Additional Amount :
This is the minimum investment amount for an existing investor in a Investment Strategy.

Yield to Maturity :
The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP :
SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs 500 every 15th of the month in an equity fund for a period of three years.

NAV :
The NAV or the net asset value is the total asset value per unit of the Investment Strategy after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the Investment Strategy.

Benchmark :
A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of s, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Exit Load :
Exit load is charged at the time an investor redeems the units of a . The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit Load. For instance if the NAV is Rs.100 and the exit load is 1%, the investor will receive Rs.99

Macaulay Duration :
The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

Net Equity :
Net equity level is the net equity exposure percentage adjusted for any derivative positions in stocks or index for hedging or rebalancing purpose.

AUM :
AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a Investment Strategy or any investment firm.

Holdings :
The holdings or the portfolio is a Investment Strategy latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Investment Strategy :
The investment objective and underlying investments determine the nature of the Investment Strategy. For instance, a Investment Strategy that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a Investment Strategy that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile :
Investment Strategys invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the Investment Strategy in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Statutory Details & Risk Factors

Please note that the Risk-Band(s) specified above will be evaluated and updated on a monthly basis

YTM : Yield to maturity should not be construed as minimum return offered by Investment Strategy. Yield to Maturity for holding Additional Tier 1 Bonds and Tier 2 Bonds issued by Banks is computed based on Yield used for valuation for such Securities. Annualized Yield to Maturity converts instrument coupon into annualized format wherein the coupons are paid on a semi-annualized basis.

Disclaimer of SIF : Investments in Specialized Investment Fund involves relatively higher risk including potential loss of capital, liquidity risk and market volatility. Please read all investment strategy related documents carefully before making the investment decision.
